UX RESEARCH ASSISTANT - MEDICAL RECORDS RESEARCH

Nov 2024 - Jun 2026

GLOWM | Drexel University

Conducted literature research and platform comparison to identify priorities for improving GLOWM's medical record workflows.

- **Research synthesis:** Synthesized literature on maternity care and electronic medical records into three workflow priorities: patient lookup, care-history review, and visit documentation.
- **Platform comparison:** Compared OpenEMR and OpenMRS with GLOWM to identify opportunities for clearer record organization, easier access to previous care, and more structured clinical data entry.
- **Recommendations:** Developed recommendations for patient-ID search, dated care summaries, and shorter visit forms with consistent measurement units and completion states, providing a foundation for future design and validation.

DREXEL WORKS - CAMPUS JOB SEARCH APP

Sep 2025 - Mar 2026

UI/UX Designer | Drexel University

Designed a campus job-search app that brings job discovery, eligibility details, and application tracking into one student experience.

- **Research insights:** Translated findings from 84 student surveys and 10 interviews into design priorities addressing scattered listings, unclear eligibility, outdated information, and application tracking.
- **Interactive prototype:** Designed an interactive Figma prototype that brought job discovery, eligibility filters, saved roles, applications, and status updates into one student experience.
- **Search efficiency:** Prototype testing with 30 students showed 42% less time spent finding eligible jobs and 31% fewer irrelevant or unavailable listings opened.
- **Eligibility clarity:** Achieved 86% first-pass understanding of eligibility badges during student testing, helping participants identify suitable opportunities.
- **Design system:** Created a reusable design system covering typography, color, eligibility badges, job cards, forms, and navigation to support consistent screens and future iteration.

M.S. in Human-Computer Interaction

Sep 2024 - Jun 2026

Drexel University

SKILLS

UI/UX Design
User Research
Interviews & Surveys
Research Synthesis
User Flows
Wireframing
Prototyping
Usability Testing
Heuristic Evaluation
Comparative Research
Responsive Design
Visual Design
Motion Design
Communication
Problem Solving

TOOLS

Figma
