WORK EXPERIENCE

UX Research Assistant | *Drexel University* Nov 2024 – Jun 2026

Researched how existing medical record systems could connect with the Global Library of Women's Medicine (GLOWM). Explored potential AI features and approaches to keeping medical records organized and updated.

- **Comparative systems research:** Studied OpenEMR and OpenMRS to understand how they organize and maintain medical records. Compared their approaches to record management to inform research into how these systems could work alongside GLOWM.
- **Integration exploration:** Investigated possibilities for connecting medical record systems with GLOWM. Examined how the systems' existing workflows could support a connected experience while keeping patient information organized and current.
- **AI feature exploration:** Researched whether AI could support medical record organization and updates as a potential GLOWM feature. Considered its possible role within record-management workflows and how it could support maintaining information over time.

DREXEL WORKS - CAMPUS JOB SEARCH APP | *Drexel university Project* Sep 2025 - Mar 2026

Independently designed a campus job-search app concept for Drexel students, covering user research, wireframing, visual design, prototyping, and usability testing.

- **User research**: Surveyed 30 students and interviewed 15 to identify challenges with scattered listings, unclear eligibility, and outdated job information.
- **Research synthesis:** Organized findings into student needs and design priorities. Focused the concept on bringing listings together, clarifying who could apply, presenting consistent job details, and helping students follow their applications.
- **User flows and wireframes:** Developed flows for discovering jobs, reviewing requirements, applying, and tracking progress. Created wireframes to establish screen layouts, navigation, and the placement of information needed at each step.
- **Design and prototyping:** Built an interactive Figma prototype with eligibility badges, job filters, and an application dashboard.
- **Usability testing:** Tested with 15 students to evaluate job discovery, eligibility clarity, and completion of application tasks.

EDUCATION

M.Sc Drexel University | *Human Computer interaction* *Philadelphia* | 2024 - 2026

Rajalakshmi Engineering College | *Computer science engineering* *India, Chennai* | 2019 - 2023

ADDITIONAL EXPERIENCE

Skills: UI/UX Design, User Research, Interviews & Surveys, Research Synthesis, User Flows, Wireframing, Prototyping, Usability Testing, Heuristic Evaluation, Comparative Research, Responsive Design, Visual Design, Motion Design, Communication, Problem-solving

Tools: Figma, Adobe CC

AI Tools: Figma Make / Vizcom / Claude / Copilot

Previous Experience: Aramark, Night Kitchen Interactive, PickYourTrail, Tata Consultancy Services
